

# Decisions

become so simple.

POC  
Point of Care

Soldiers with unique mission:  
To Save Lives.

XLAB SOLUTIONS

## X-Lab Solutions in a few words:

### THEN...

**At first**, X-Lab Solutions' activity focused on maintenance and repairs. Along the way, the development of turnkey medical projects and providing lab supplies, have become priorities.

### AND NOW...

**Today**, the focus is on providing after-sales services for medical equipment and projects (installation, commissioning, training, application support, service, maintenance).

## Achievements:

OVER **110**

**equipped hospitals**

and the associated services delivered, all over Europe.

OVER **120**

**private laboratories**

equipped with diagnostic systems and serviced.

OVER **170**

**private healthcare institutions**

equipped with medical devices and accessories.

## Part of business philosophy:

- **PREMIUM SOLUTIONS** for any request
- **TOTAL AVAILABILITY** due to local service centers in countrywide
- **KNOW-HOW** for products and for the market
- **CREATIVITY** in business and sales solutions

## The pillars of X-Lab Solutions:

**POC**  
**Point of Care**

Soldiers with unique mission:  
**To Save Lives.**

**W`SHC**  
**In Vitro Fertilisation & Medical Devices**

Fighters with a single ambition:  
**To Give and To Conserve Lives.**

**SP**  
**Special Projects**

Combatants with a special plan:  
**To Care for Lives.**

## QUALITY CERTIFICATIONS

As simple  
as that!

with **Point of Care** solutions.

control safety speed performance

**Point of Care** brings important benefits for patients and the medical team: it improves their experience through accurate results, reduced waiting time and increased availability. **Point of Care** easily fulfills its mission of providing patient safety right at the bedside.

# Point Of Care products

## BLOOD GAS AND ELECTROLYTE ANALYZERS

### ABL90 FLEX analyzer

- Benchtop features in a compact design
- Automatic quality management
- Minimum maintenance
- IT connectivity
- Blood gases, electrolytes, metabolites and oximetry results in just a few seconds

### ABL90 FLEX PLUS analyzer

- Fast analysis
- Reliable results
- Easy to use and maintain

### ABL800 FLEX analyzer

- High analytical performance in the measurement of pH, blood gases, electrolytes, metabolites and oximetry parameters
- High performing technology and unique FLEXQ module

### ABL9 analyzer

- Clear information on acid-base balance, oxygen uptake, oxygen transport and electrolyte status
- Accurate blood gas analysis

## CARDIAC MARKERS ANALYZERS, SEPSIS, PREGNANCY, COAGULATION

### AQT90 FLEX analyzer

- Reliable results in as few as 10 minutes\*
- Easy to use, reduces demands on staff, eliminates user variability and further increases patient safety

\*Time to result for NT-proBNP is 10:10 min

## TRANSCUTANEOUS MONITORS

**TCM5 FLEX**  
monitor

**TCM5 BASIC**  
monitor

### TCM Radiometer monitors

- Continuous and non-invasive transcutaneous pCO<sub>2</sub>, pO<sub>2</sub> and Masimo SET® SpO<sub>2</sub> pulse oximetry information
- Advanced features that optimize monitoring of neonatal, pediatric and adult patients. Special modes with dedicated features for ICU, Sleep and Home Care

## COLLECTION SYSTEMS

### PICO A, 70, safePICO samplers

- Optimal for pH, blood gas, oximetry, electrolyte and metabolite analysis
- For arterial line sampling and arterial puncture sampling
- Preheparinized with dry electrolyte-balanced heparin for high analytical quality

## SINGLE PARAMETER POC ANALYZERS

### HbA1c 501 System

- Fully automated point of care system
- Automatic checks and calibrations built into the system

### WBC DIFF System

- Accurate counts for neutrophils, lymphocytes, monocytes, eosinophils and basophils
- Suitable for different clinical applications

### Hb 801 System

- Provides quick, easy access to lab-quality results without compromising accuracy, even in demanding climates with high temperatures and humidity
- Easy to use

### Hb 301 System

- Optimised for anaemia screening in primary care and blood donation settings
- Provides quick, easy access to lab-quality results without compromising accuracy

### Hb 201 DM System

- Complete data management solution
- Improved patient safety with features like QC lock-out and built-in barcode scanning for patient ID

### Hb 201<sup>+</sup> System

- Laboratory accuracy and ease of use
- Healthcare providers globally depend on immediate results to make critical decisions when they matter most

## Glucose 201 DM System

- The highest accuracy at the POC while reducing the risk of spreading infection
- Instant data connection and customizable prompts for full control and great efficiency
- Used for screening, monitoring and diagnosis of diabetes mellitus

## Glucose 201<sup>+</sup> System

- Deliver high-quality information to healthcare professionals at the POC
- Unique microcuvette technology ensures accuracy in three simple steps while minimizing the risk of contamination
- Used for screening, monitoring and diagnosis of diabetes mellitus

## Plasma/Low Hb System

- Accurate evaluation of hemolysis
- Dedicated support and service
- Easy to use

## MULTI PARAMETER POC ANALYZERS

## Eurolyser CUBE-S

- Fully automated „walk-away“ analysis
- Results in a matter of minutes, rather than days

## URINE ANALYZERS

Semi-Automated Urine Strip Reader

Compact Urine Strip Reader

## Laura & Laura Smart

- Efficient, powerful and compact solutions for routine chemical urinalysis
- Semi-automated technology
- Facilitate the samples processing and contribute to correct diagnosis of the patients

## NURSE-PATIENT COMMUNICATION SYSTEMS

### NurseCare

- IP-based nurse call solution for hospitals, nursing homes and home care
- Ideal to automate the processes, to efficiently organise your care documentation and to receive information on current events with a mouse click
- Touch terminals can receive data via WLAN and room buttons can be equipped with wireless transmitters

## LARYNGOSCOPES

### Anaesthesia Laryngoscope sets

- Available in a range of set configurations to suit your demand
- The set contains a clear, impact resistant polypropylene case, which allows the contents to be clearly visible
- The contents of each set is 3 Macintosh laryngoscope blades with an insert to ensure the blades are secure in the case and a laryngoscope handle

### Video Laryngoscope

- Same blade shape, same light output but with an optimum view
- Optimum quality product at an affordable price point
- Large 3.75" LCD screen with a 2.0 megapixel blade camera
- One year guarantee and after-sales support available

# Total availability in less than 24 h anywhere in Romania and Moldova.

Contact us for technical support, service for your equipment or consumables.

We are offering an unique and customized range of services:

## SALES SERVICES

Our sales representatives deeply understand your needs and guide in taking your best decisions.

## TRAINING SERVICES

Through our training services you will know exactly how to operate your equipment according to the manufacturer's instructions.

## MAINTENANCE & SUPPORT

Our engineers are highly skilled in servicing the equipment we provide.
